**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 21, drawn to a method for course management, classified in class 434, subclass 350.
  - II. Claims 11-16, drawn to a method for grading and maintaining a grade book within an online course, classified in class 434, subclass 322.
  - III. Claims 17-20, drawn to the management of an on-line discussion board, classified in class 455, subclass 509.
  - IV. Claims 22-26, drawn to a system for management of faculty activities in an online course, classified in class 434, subclass 262.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IV have separate utility. See MPEP § 806.05(d). The invention of group I is a method and system for management of the actual students within an on-line instructional system. It is useable in any online management system.

The invention of group II is a method for monitoring the grading of homework assignments that have been turned in for grading. Although the method may be used with the method of Invention I the system may be used individually for the tracking of grades and is not dependent on the tracking of access to the online educational course.

Art Unit: 3713

The invention of group III is a method for maintaining and viewing a discussion thread on an on-line message board. The method is neither dependent on the management method of Invention I nor the grading system of Invention II.

The invention of group IV is a method for the management and tracking of teacher activities within an online course. It is dependent on none of the above inventions.

All four of the previously mentioned Inventions are disclosed as being useable to together in a method and system for the complete management of on-line educational courses. However each invention could be used separately to track any single aspect of an educational course electronically. Therefore, because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Kent Genin on 07/16/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
